DAY -1

**KEYNOTE
PRESENTATIONS**

**AUGUST
19-21, 2026**

TORONTO, CANADA

**Dr. Gloria Kwartema
Alabi Hansen**

ASAP Global LLC,
USA

Biography

Dr. Gloria Kwartema Alabi Hansen is an entrepreneur, international trade advocate, educator, and business leader. She is the Founder and Chief Executive Officer of ASAP Global LLC and the Affluence Skills Acquisition Program (ASAP Education). Her work focuses on entrepreneurship development, leadership training, women's empowerment, and international trade promotion. As a member of the Business Council for Women in International Trade under the International Trade Council, she contributes to initiatives that expand opportunities for women in global commerce. Dr. Hansen is passionate about equipping individuals with practical skills, business knowledge, and leadership capabilities that foster economic growth and self-sufficiency. Through mentoring, consulting, and educational programs, she continues to inspire emerging entrepreneurs and professionals while promoting innovation, sustainable development, and cross-border business collaboration.

Intelligence in Business Consultancy and Public Relations

Abstract:

The companies that will lead tomorrow are not those with the biggest budgets, but those with the smartest technology." Artificial Intelligence is transforming business consultancy and public relations by enabling organizations to make faster decisions, improve customer engagement, and increase profitability. Over the next two years, AI will become an essential tool for consultants and PR professionals seeking to remain competitive in a rapidly evolving digital economy. AI-powered analytics can process large volumes of data, identify market trends, predict customer behavior, and provide strategic recommendations that improve operational efficiency and business growth. In public relations, AI supports media monitoring, reputation management, audience analysis, and personalized communication. Businesses can use AI to automate repetitive tasks, improve response times, and create targeted campaigns that strengthen customer relationships and brand visibility. The benefits include higher productivity, reduced operational costs, enhanced decision-making, increased revenue opportunities, and improved customer satisfaction. Although risks such as data privacy concerns, cybersecurity threats, and algorithmic bias exist, these challenges can be minimized through responsible governance, employee training, and strong security frameworks. Emerging technologies such as cloud computing, machine learning, predictive analytics, blockchain, CRM platforms, and automation tools can further help companies scale operations and maximize profits. An ideal solution is an AI-powered Business Growth Intelligence Hub, a platform integrating consultancy, PR management, market intelligence, customer analytics, and financial forecasting into one ecosystem. Organizations that embrace AI strategically will gain a sustainable competitive advantage and unlock new opportunities for growth, innovation, and global impact.

Priya Kothari Jain

Washington University of
Science and Technology
(WUST) Foundation, USA

Biography

Priya Kothari serves as Executive Director of the Washington University of Science and Technology (WUST) Foundation, USA, where she leads global initiatives focused on women's entrepreneurship, youth empowerment, and inclusive innovation. Through strategic partnerships and programs such as the WISE Accelerator, she works to build sustainable innovation ecosystems that connect academia, industry, government, and communities to empower entrepreneurs and innovators worldwide. She is also a Global Leader with the Global Entrepreneurship Network, working across more than 200 countries, and an Executive Founding Member of Youth Aid Foundation, India. Priya initiated one of India's largest grassroots young entrepreneurs' summits, active across 25 states, promoting entrepreneurship movements and supporting more than 50,000 entrepreneurs. She is the youngest Board Director of CYDA India and a World Bank Youth Summit Innovation Lab winner, recognized for her creative solution in innovation and sustainable impact.

Innovation without Boundaries: Ecosystem Builders Powering Inclusive Global Entrepreneurship

Abstract:

Ecosystem builders are essential to the growth of startups and young innovators, providing the networks, resources, and collaborative environments needed to transform ideas into impactful ventures. Washington University of Science and Technology Foundation form a one-stop global innovation ecosystem that integrates academic excellence, research infrastructure, entrepreneurial training, and international partnerships under a single unified platform.

Through the WISE Accelerator (WUST Incubator for and Startups and Entrepreneurs), innovators gain access to a boundary-less space for experimentation, mentorship, prototype development, and cross-border collaboration. WISE removes traditional limitations by offering global support systems—connecting founders to international experts, diverse markets, funding pathways, and industry leaders. This global reach is increasingly necessary as startups operate in interconnected markets where competitive advantage depends on international exposure, multidisciplinary learning, and access to worldwide networks. The integrated WUST Foundation–WISE model strengthens innovation pathways by providing end-to-end support: skill development, business model refinement, technical guidance, funding readiness, and opportunities for global scaling. Young innovators, who often face gaps in exposure, entrepreneurial education, and professional networks, benefit from inclusive learning environments and structured programs that accelerate their growth.

Overall, this ecosystem demonstrates how strategic collaboration and boundary-less innovation spaces empower startups and young innovators to move from ideas to impact—contributing meaningfully to economic development, technological advancement, and global entrepreneurship.

VandanaPuranik

Active Ingredients Inc,
Canada

Biography

VandanaPuranik is a bestselling author, TEDx speaker, and founder of Active Ingredients Inc. & What She Said. With over 25 years of global experience scaling companies and shaking up systems, she's helped visionaries turn chaos into clarity and achieve breakthrough success. Her work spans industries and borders, with speaking appearances at Harvard, Oxford, Stanford, and more.

Fearless & Limitless: Redefining Success for the Next Generation

Abstract:

The world has changed, but our definition of success hasn't kept up. 'Fearless & Limitless' is a bold reimagining of what achievement looks like in today's world especially for those who've always been told they don't fit the mold. Through powerful storytelling, research-backed insight, and a high-energy delivery, VandanaPuranik unpacks the real barriers to fulfillment internal, societal, and systemic and equips audiences with the tools to redefine success on their terms. From boardrooms to classrooms, her message activates untapped potential and challenges audiences to think bigger, act bolder, and embrace their unique edge. This talk is an invitation to break the rules, solve the impossible, and live without limits.

Marc A Rosen

Ontario Tech University,
Canada

Biography

Marc A. Rosen is a Professor at Ontario Tech University in Oshawa, Canada, where he served as founding Dean of the Faculty of Engineering and Applied Science. Dr. Rosen was President of the Engineering Institute of Canada. He is a registered Professional Engineer in Ontario, and serves as Editor-in-Chief of several journals and he was a Director of Oshawa Power and Utilities Corporation. With over 60 research grants and contracts and 900 publications, Dr. Rosen is an active teacher and researcher in sustainable energy, environmental impact, and energy technology (including renewable energy and efficiency improvement). Much of his research has been carried out for industry, and he has written numerous books. Dr. Rosen has worked for such organizations as Imatra Power Company in Finland, Argonne National Laboratory near Chicago, and the Institute for Hydrogen Systems near Toronto. Dr. Rosen has received numerous awards and honors.

Expanding the Prospects for Sustainable Development through Energy Sustainability

Abstract:

Sustainable development is a critical, central and important goal and means for human and societal activity. Energy sustainability is of great importance to any activities and plans for overall sustainable development, and the achievement of sustainability. This is particularly important given 1) the pervasiveness of energy use throughout almost all aspects of societies and the lives of people, 2) the importance of energy in economic development of societies and the living standards attained by people, and 3) the significant impacts that energy processes and systems have on the environment and the ecosystems within them. Many factors that need to be considered and appropriately addressed in moving or shifting towards energy sustainability are examined in this talk. These include appropriate selection of energy resources bearing in mind sustainability criteria, facilitation of the use of sustainable energy resources particularly through the use of appropriate energy carriers, enhancement of the efficiency of energy-related processes, a holistic adoption of environmental stewardship in energy activities, and others. In addition, other key sustainability measures are addressed, such as economics, equity, land use, lifestyle, sociopolitical factors and population. Conclusions are provided related both on options for energy sustainability and on means to achieve sustainable development and overall sustainability. But throughout, a special focus is placed on energy, given its pervasiveness and importance, as well as its centrality in much of human activity.

Mike Ivanof

GlobalBox.world,
Canada

Biography

Senior academic professional with substantial experience in advanced capacities in academia as Associate Dean, Director of the School of Business, Executive Director MBA programs, Director of Executive MBA, and Director of Academic Program Development seeking to play an integral role in the development efforts of an academic institution with global aspirations.

The Development of The Internet of Commerce - The Single Point of Convergence for All Market Forces Worldwide, with a Specific Focus on Hyper-localization

Abstract:

Start-up is defined as a newly emerged business to satisfy the market needs. The percentage of risk for this is very high. It mainly revolves around the creative ideas, thoughts, discovering new products, new services etc. Then committing the right team to improve the idea to work is the key step of a start-up. The successful journey of the team on the main idea and working collectively also plays a key role in the success of the start-up. Then comes the main thing called financial support. In the US alone a large number of campus entrepreneurship programmes are offered in universities, based on this about 27 million people are running their own business in the US topping the Global Entrepreneurship Index. Now a day's financial support for a start-up had become very easy by the esteemed support of the banks, financial institutions etc.

Mani Bhandari

AI Empower Inc,
Canada

Biography

Mani Bhandari holds a Master of Business Administration from JIMS Jagan Institute of Management Studies, India, and certification in Generative AI from IBM. She is Board of Directors with Panorama India & BMG group Canada. As the founder of AI Empower Consultants, Mani integrates advanced AI technologies into business strategies, enhancing clients' marketing effectiveness. An AI professional, Mani has achieved significant milestones in workshop development, introducing project-based learning to engage students in solving real-world problems, thereby enhancing their creative and practical skills. Mani's expertise drives innovation and efficiency.

From Chatbots to AI Employees: Building Revenue-Generating AI Agents for Organizations

Abstract:

Organizations are rapidly moving beyond simple chatbots toward AI-powered digital workers capable of performing tasks, answering complex questions, capturing leads, managing knowledge, supporting employees, and automating workflows.

This presentation explores a practical framework for designing and deploying AI Agents across healthcare, education, manufacturing, professional services, and small businesses.

Drawing on real-world implementations, attendees will learn how AI Agents can:

- Reduce operational costs
- Improve customer engagement
- Accelerate employee onboarding
- Capture and qualify leads
- Support workforce training
- Scale organizational knowledge

The session presents practical lessons learned from building AI-powered assistants, industry knowledge platforms, and workforce learning systems, providing a roadmap for organizations seeking measurable ROI from AI investments.

**Mahlena Rae
Johnson**

Mr. J Media,
Canada

Biography

Mahlena is the Conference Optimizer for introverted CEOs and thought leaders. She teaches speakers how to achieve the ROI you didn't get from your last event. A Canadiane of Américaine descent, Mahlena is living her best life in the suburbs of Toronto. This megalomaniacal INTJ has been featured on Business Insider, Gratitude Geek, CBC Kids, The Quiet Warrior Podcast, and more.

It's the Audacity for Me: How to Use Your Introversion as a Superpower

Abstract:

Introversion is often misunderstood as shyness or a lack of social skills, but it is actually a profound source of strength—a quiet power that, when harnessed with a bit of “audacity,” becomes a formidable superpower. In a world that frequently glorifies the loud and the immediate, being an introvert allows you to bring depth, strategy, and empathy to the table.

Carlos Hidalgo

Carloshidalgo.co,
USA

Biography

Carlos is a gifted communicator. He speaks with authenticity and confidence and connects well with his audience. He brings a warm and engaging presence and is always genuine and sincere, while at the same time being straightforward.

Overcoming Adversity by Embracing It

Abstract:

All of us at some point in our lives will face adversity, it is not an if, but when. Adversity, is an unfortunate part of life, but how we respond to it is critical. On December 1st, 2025, my life came to a screeching halt. After one ambulance ride and a life flight, I was informed I had suffered a hemorrhagic stroke, which has a 50% mortality rate. This was more than adversity, this was a mountain. I am not alone, many have faced mountains in their lives which seem insurmountable. But, as I continue to recover, I have realized that the best way to deal with adversity is not necessarily overcome it, but to embrace it. In this engaging and inspirational keynote, I lead my audiences through the story of being fine one second and on the floor the next, I open up about the highs and the lows of my recovery, the lessons I continue to learn and share the benefits and joys that we can find in adversity if we choose to embrace it and allow it to shape us.

A faded background image of the Toronto skyline, featuring the CN Tower prominently in the center, surrounded by various skyscrapers and buildings.

DAY -1

**ORAL
PRESENTATIONS**

**AUGUST
19-21, 2026**

TORONTO, CANADA

Diane Wolf

Diane Wolf Consulting,
Canada

Biography

Diane Wolf helps leaders go beyond managing stress—to mastering it. As a Registered Psychotherapist and former business professor, she uniquely bridges the gap between brain science and business strategy. Her neuroscience-based approach empowers business owners, executives, and teams to transform high-pressure challenges into strengths that drive clarity, resilience, and long-term success. The results? Increased productivity, reduced burnout, and sharper decision-making—fueling stronger leadership and enhanced team performance. With over 40 years of expertise, Diane equips leaders with the tools to recognize and disarm the hidden toll of stress on mental, physical, and emotional health. Holding an MBA in Learning and Knowledge Management, a Master's in Clinical Counseling, and certification as a Clinical Trauma Professional, she also works with first responders diagnosed with PTSD—giving her deep, firsthand insight into resilience under extreme pressure.

Wired for Resilience: Harnessing Neuroscience to Thrive Under Pressure

Abstract:

In today's high-stakes environment, entrepreneurs and leaders are under increasing pressure to perform, pivot, and persevere. Yet, unmanaged stress silently erodes productivity, decision-making, and team cohesion. In this science-backed, interactive workshop, psychotherapist and former business professor Diane Wolf empowers participants to rewire their brains stress response and unlock the tools to lead with clarity, resilience, and control. Grounded in neuroscience and refined through over 40 years of experience in leadership development and trauma recovery, this session delivers a proven framework for transforming pressure into performance. Participants will learn: -

- How chronic stress impacts executive function and leadership effectiveness
- The neuroscience behind resilience and how to build it intentionally
- Practical techniques to regulate stress, improve decision-making, and sustain energy
- Interactive strategies for fostering resilient, high-performing teams

Whether you're leading a startup or scaling an organization, this session equips you with evidence-based tools to not just manage stress but to use it as a strategic advantage. Format: 60/90 minute workshop (customizable) Ideal Audience: Entrepreneurs, executives, team leaders, business owners Delivery Style: Interactive, research-driven, outcome-focused.

**Suzanne Doyle
Ingram**

Prominence Publishing,
Canada

Biography

Suzanne Doyle-Ingram helps entrepreneurs, executives, and founders use books as strategic business assets that generate clients, speaking opportunities, and longterm credibility. She is the founder of Prominence Publishing, a company that has helped hundreds of experts turn their knowledge into books that work for them 24 hours a day. Suzanne does not help people “write books”. She helps people build authority through books. Her approach is grounded in a simple belief. A book should not just be a product to sell. It should be a business asset that positions you as the obvious expert in your field and generates opportunities while you sleep. She speaks for conferences, executive peer groups, and high-level masterminds. Her talks are practical, strategic, and grounded in real-world experience. She does not offer theory. She offers systems that experts can implement immediately to build their visibility and attract the opportunities their expertise deserves.

The Authority Gap: Why Experts Stay Invisible and How to Fix It

Abstract:

Most experts assume their visibility problem is a marketing problem. It is not. It is a positioning problem. In this talk, Suzanne breaks down the three specific gaps she sees with founders and executives, and the exact system she uses to close them. The audience leaves with a clear framework for understanding why they are underperforming their potential and a concrete path forward.

Faith Samkange

University of Derby,
UK

Biography

Dr. Faith Samkange is a Senior Lecturer in the Contemporary Centre for Hospitality and Tourism Management, with extensive international experience in higher education, research, and academic leadership. She obtained her MSc in Hospitality and Tourism Management in Canada before completing her PhD at the University of Derby, United Kingdom, in 2008. Her doctoral research specialised in International Hospitality and Tourism Management, with a particular emphasis on technological development and innovation.

Sustainable Entrepreneurship Strategies and Operational Execution: SADC Gender Entrepreneurship Challenges and Solutions in Botswana

Abstract:

Entrepreneurship development strategic decisions are designed in Southern African Development Communities (SADC). Research findings indicate that the SADC sustainable gender equality entrepreneurship strategic execution is yet to be fully explored. Sustainable environmental, social, and economic success remains problematic. This collaborative partnership research study explores sustainable gender equality entrepreneurship strategies and their operational and marketing implementation, challenges, and related solutions in Botswana as part of SADC region. Methodologically, interpretive, inductive, qualitative, and thematic analytical research processes and procedures, were applied in two phases. Research findings indicate that the relationships between sustainability, technological development and business transformation remain as huge gender entrepreneurship challenges. The key marketing and operational practical challenges are cultural, financial, global, technological, innovative, and transformative. The application of sustainable Key Performance Indicators (KPIs) and Artificial Intelligence (AI) design, performance, impact, and outputs of operational and marketing practices are some of the suggested solutions. Suggestions aligning with sustainable triple bottom line, success, growth, profitability, and competitiveness to improve the operational and marketing KPIs and AI of gender entrepreneurship are addressed. The sustainable development goals (SDGs) involved include SDG 1 No Poverty, SDG 5 Gender Equality, SDG 8 Decent Work and Economic Growth, SDG 9 Industry Innovation and Structure; and SDG 10 Reduced Inequalities. The research recommendation demonstrates the application of the generated theory entitled, Innovative and Transformative Sustainable Gender Equality Entrepreneurship going forward. The collaborative partnership future research project will therefore test, apply, and evaluate this theoretical contribution.

Jordan Ovejas
Founder, dayNumber,
Canada

Biography

Jordan Ovejas is a Filipino-Canadian illusionist, capital strategist, and founder of The Billions Club—a global movement currently in launch phase, developing a digital platform, docuseries, and \$100M+ impact fund to help visionary founders and nonprofits remove funding barriers and bring world-changing ideas to life. Since 2007, Jordan has led sales teams, built marketing campaigns, and helped connect impactful ventures with capital partners deploying millions. As a professional illusionist, he's performed internationally, using wonder to unlock belief, shift mindsets, and inspire bold action. He is also developing All About the Billions, a 52-city docuseries capturing the behind-the-scenes journeys of founders who built billion-dollar companies from humble beginnings, showing what's possible for the next generation of changemakers. Blending business, story, and spectacle, Jordan's mission is to ignite a global movement of impact, wealth, and purpose, powered by belief.

The Invisible Thread: Faith, Failure, and the Magic of Alignment

Abstract:

In a world of uncertainty, risk, and relentless pursuit of success, entrepreneurship can feel like a high-stakes illusion, filled with setbacks, surprises, and moments of doubt. In this transformative hybrid presentation, Jordan Ovejas bridges the worlds of capital and magic to deliver a mind-shifting experience that inspires entrepreneurs to reframe failure as fuel for future alignment. Drawing from two decades in sales, marketing, and capital advisory, alongside a global career as a close-up illusionist, Jordan shares powerful stories, illusions, and strategies to help founders see how their greatest breakdowns often lead to breakthrough moments. With interactive magic woven throughout, this session is not just seen, it is felt. Attendees will leave reminded that their current struggles may, in hindsight, be the very events that connect them to their highest calling. Whether pitching investors or battling imposter syndrome, the message is clear: have faith, trust the invisible thread, and know that everything is happening for a reason, even if you can't see it yet.

Adeyinka Adeosun

News Central Media Ltd.,
Nigeria

Biography

Adeyinka Adeosun is a distinguished financial strategist and transformational business leader with over 20 years of progressive experience architecting growth, driving profitability, and building sustainable enterprises across oil and gas, higher education, real estate, media, technology, and FMCG sectors. As a Chartered Accountant and certified fraud examiner, he combines technical excellence with strategic vision to deliver measurable business outcomes. Currently serving as Internal Auditor (Governance, Risk & Compliance) at News Central Media Ltd. where he serves as the critical liaison between Board and Management, Board Member at RewTech (overseeing Urban Drive and BatMart ventures), and Co-Founder of Goal Centric Consulting, Adeyinka is at the forefront of entrepreneurial innovation and corporate governance in Nigeria's dynamic business landscape.

Governance, Risk & Compliance for Entrepreneurs

Abstract:

Governance, Risk and Compliance (GRC) is a strategic framework for integrated compliance and risk management. GRC synchronizes governance, risk and compliance activities across the organisation. This enables effective compliance monitoring, accurate reporting, and proactive management of regulatory risk. GRC allows businesses to operate more efficiently by sharing information, reporting more accurately, and avoiding wasteful overlaps.

While GRC is not a new concept, today's dynamic regulatory and risk landscape has prompted businesses to take an integrated approach to GRC management. This allows businesses to mitigate risks and take advantage of new opportunities while always ensuring compliance with legal and regulatory demands. GRC is more than a collection of policies or software tools; it's a comprehensive philosophy and operational model that integrates governance structures, risk management practices, and compliance obligations across the enterprise. The term was first introduced by the Open Compliance and Ethics Group (OCEG) in 2007 and has since become widely adopted across industries.

Parul Yadav

North Wave Media,
Canada

Biography

Parul Yadav is a Toronto-based PR strategist and founder of North Wave Media, a boutique communications agency specializing in healthcare, senior care, and purpose-driven organizations across Canada and the United States. Working closely with healthcare providers, non-profit health organizations, and senior care brands, Parul builds trust-first communications strategies that bridge the gap between clinical excellence and community connection her work sits at the intersection of strategic communications, cultural competency, and accessible healthcare storytelling.

Beyond the Waiting Room: How Strategic Communications and Community Trust are Closing the Healthcare Visibility Gap for Underrepresented Communities

Abstract:

Access to healthcare has long been framed as a policy problem. But for millions of immigrants, racialized communities, and underrepresented patients navigating unfamiliar systems, it is first a visibility and trust problem. This presentation makes the case that strategic PR, intentional storytelling, and community-driven communications are not soft skills in healthcare. They are life-changing infrastructure. Drawing on real client work across healthcare organizations, senior care providers, and community health initiatives in Canada and the United States, this presentation introduces a trust-first communications framework specifically designed for healthcare entrepreneurs, HealthTech founders, and providers serving underrepresented populations. Key findings presented include how patient-centered storytelling directly impacts engagement and health-seeking behaviour in immigrant and racialized communities, why BIPOC and newcomer patients consistently distrust healthcare systems that communicate at them rather than with them, and how healthcare organizations that invest in culturally competent PR consistently outperform those relying solely on clinical credibility and traditional advertising. This presentation also examines the growing intersection of government health policy including recent CMS reforms around Medicare access, prior authorization, and GLP-1 affordability and the communications gap that exists between policy change and community awareness particularly for seniors and newcomer populations who are least likely to receive timely, accessible information about their own care options. Attendees will leave with a practical, equity-informed communications framework they can apply to build trust, expand reach, and create meaningful visibility in communities that need it most.

Dr William Klement

Winthrop University,
USA

Biography

Dr. William Klement is an early-career Assistant Professor of Computer Science and AI at Winthrop University, South Carolina. He specializes in applying and improving machine learning methods for healthcare. He earned his PhD in machine learning at the University of Ottawa and completed various post-doctoral training in clinical and healthcare related research at McGill University, Thomas Jefferson University, University health Network and University of Toronto. He published 23 peer reviewed articles, 23 medical abstracts and various conference papers and workshop proceedings.

The good, the bad and the ugly of incorporating machine learning algorithms in signal processing for biomedical engineering

Abstract:

The rapid growth of complex machine learning (ML) tools that are integrated into healthcare calls for increased scrutiny of results. While ML solutions offer exciting opportunities, evidence of limitations and drawbacks when using them in biomedical engineering continues to emerge. None-the-less, the tolerance of an uneven trade-off between error and bias appears to be increasing among healthcare providers. This tolerance exposes the healthcare system to realistic risks of potential failures. Currently, the demand for ML tools outpaces specialized skills needed for development. Although issues like credibility, robustness, safety, explainability, and fairness, appear external to the ML algorithm, we propose that they be considered in the development phase of the model. We argue that building specialized ML models for healthcare requires refined expertise to optimize their training, testing and validation, prior to deploying them in clinical settings. In previous work, we presented a consolidation of reporting guidelines for healthcare researchers and practitioners when developing prognostic or diagnostic tools that use ML methods. We showed that the focus in practice is far from comprehensive nor is consistent. In this talk, we plan to discuss challenges and potential perils to tackle when building ML models for biomedical signal processing. This includes data concerns, algorithm characteristics, experimental approaches, performance assessment and validation strategies. Our objective is to promote and develop reliable and practical guidance for researchers to construct credible, robust, safe, fair, and trustworthy machine learning solutions for healthcare applications.

Ashok Ranade

DeerghAayu Wellness Trust,
Canada

Biography

Ashok Ranade is a founder of DeerghAayu Wellness Trust in Canada.

Agentic AI for Personal Health Management: Architecture and Use Cases

Abstract:

The growing availability of wearable devices, digital health records, and consumer health applications has created unprecedented volumes of personal health data. However, most individuals lack tools to integrate these data streams into actionable insights that support preventive healthcare and collaboration with clinicians. Recent advances in generative and agentic artificial intelligence enable systems capable of autonomously organizing information, generating insights, and assisting decision-making. This study proposes an architecture for agentic AI systems designed to support personal health management (PHM) by integrating diverse health data sources and delivering personalized insights and clinical summaries.

A faded background image of the Toronto skyline, featuring the CN Tower prominently in the center, surrounded by various skyscrapers and buildings along the waterfront.

DAY- 2

**KEYNOTE
PRESENTATIONS**

**AUGUST
19-21, 2026**

TORONTO, CANADA

Senator Mona Das

Founder of Moxy Foundation,
USA

Biography

Mona Das is an international speaker, former Washington State Senator, and founder of Canary Revolution, a global initiative dedicated to empowering individuals to live and lead authentically. Recognized as a champion for equity, sustainability, and women's empowerment, Mona combines her expertise in leadership, policy, and entrepreneurship to inspire audiences around the world. Her award-winning documentary, 'Bad Ass Women Doing Kick Ass Shit', has received over 14 international honors. Mona's work demonstrates how authentic leadership transforms business, strengthens communities, and creates lasting social impact.

Authenticity as the New Currency: Redefining Leadership and Entrepreneurship in a Changing World

Abstract:

In a world where markets shift rapidly and innovation demands courage, authenticity has become the most valuable currency of modern leadership. This presentation explores how authentic, purpose-driven entrepreneurship is transforming industries, empowering communities, and redefining success beyond profit. Drawing from her journey as a former Washington State Senator, award-winning film producer, and global advocate for women's leadership, Mona Das shares actionable strategies for entrepreneurs to align their businesses with their values, strengthen resilience, and lead through uncertainty. Attendees will learn how self-awareness, empathy, and storytelling create trust-based enterprises capable of thriving in volatile environments. The session bridges policy, leadership, and social innovation—demonstrating that authentic entrepreneurship is not only a moral imperative but also a competitive advantage. By connecting vision with values, Mona empowers participants to embrace entrepreneurship as a force for equity, sustainability, and systemic change.

Ema Dantas

Founder of EmaDantas,
Canada

Biography

Ema Dantas is a keynote speaker, bestselling author, entrepreneur, and mental health advocate whose extraordinary life challenges conventional ideas about success, resilience, and possibility. Born in her grandparents' kitchen in a small village in Portugal, she immigrated to Canada with humble beginnings and built a remarkable legacy through determination, courage, and vision.

In 2000, as a single mother raising two daughters, Ema founded Language Marketplace from the basement of her apartment. With no business plan, no outside funding, and little more than determination, she transformed the company into one of Canada's leading language service providers. Her entrepreneurial success earned national recognition as one of Canada's Top Female Entrepreneurs in 2012, followed by inclusion on the Profit 500 list of Canada's Fastest Growing Companies in 2013. When she sold the business in 2022, Language Marketplace was generating more than \$3.5 million in annual revenue, operating debt-free, employing 24 staff members, and managing a network of over 1,500 freelance professionals.

Mental Mountains: What Climbing Everest Taught Me about Building and Letting Go of a Business

Abstract:

Did you know that the woman who summited Everest on May 13, 2022, completing one of the world's most gruelling mountaineering challenges, started her company as a single mother in a basement apartment, with no traditional business plan, no outside capital, and no safety net? She is 5 feet tall, she was born in her grandparents' kitchen in a small village in Portugal, and she is terrified of heights. EmaDantas is that woman. And the story of how she built Language Marketplace from zero to over \$3.5M in annual revenue, debt-free, with a team of 24 and more than 1,500 freelancers before successfully exiting in 2022, is not a story about strategy. It is a story about what happens when you refuse to listen to the noise, anchor your belief in something bigger than yourself, and treat every obstacle as a summit to be climbed, one intentional step at a time. In this powerful, candid keynote, Ema draws on her nearly five-year journey to complete both the Messner and Bass versions of the 7-Summit Challenge, the only Portuguese person and one of approximately 130 Canadians ever to do so, to illuminate the mental frameworks that carried her through two decades of entrepreneurship, a successful business sale, and a very public battle for her own mental health. Attendees will leave with a visceral understanding of what peak performance actually looks like from the inside: not the highlight reel, but the altitude sickness, the summit fever, the moments of doubt at base camp and the discipline to ascend anyway. Ema's session is for every woman who has ever been told her mountain is too big, her team too small, or her timing too late.

Fredah Mainah

Rainbow-Ono Sanctuary,
Canada

Biography

Dr. Fredah Mainah is the global voice for self-leadership, helping individuals and institutions lead from within before they lead the world. Dr. Fredah Mainah is an international speaker, self-leadership strategist, author, and founder of Rainbow-Ono Sanctuary – a transformational platform dedicated to helping individuals lead from within before they lead others. Born and raised in Kenya with no conventional role models, Fredah broke generational limitations by choosing self-leadership, and courage over conformity. Having once silenced her brilliance to fit traditional expectations, she now equips leaders, educators, professionals, and visionaries to reclaim their voice, values, and personal power through self-leadership. Fredah holds a PhD in Organizational Leadership with a focus on self-leadership and has been honored for her humanitarian contributions with a second honorary PhD. She is a published author, researcher of spiral pedagogy, and a respected coach whose message has touched lives across cultural, academic, and spiritual circles.

The Spiral Path: Inner Wisdom and Indigenous Leadership Practices for Modern Growth

Abstract:

The Spiral Path: Inner Wisdom and Indigenous Leadership Practices for Modern Growth is a transformative session designed for emerging leaders and newly appointed executives seeking deeper clarity, resilience, and purpose in their leadership. In a time defined by rapid change and constant pressure, this session introduces participants to Indigenous leadership principles rooted in harmony, intuition, community, and inner knowing—timeless guides for sustainable growth in modern environments. Drawing from her cultural heritage, lived experience, and years of research, Dr. Fredah Mainah leads attendees through her SPIRAL™ Reflective Self-Leadership Framework, a holistic model that helps leaders slow down, reconnect with their inner compass, and approach decision-making with greater intentionality. Participants will learn how to integrate intuition and ancestral insight into their daily leadership rhythms, discover how non-linear and cyclical growth patterns support long-term alignment and personal sustainability, and shift from overachievement toward inner alignment by balancing being and doing. The session equips leaders with grounded tools and reflective practices they can immediately apply to their teams, organizations, and personal leadership journeys, making it a powerful fit for individuals committed to leading with authenticity in a fast-paced world.

Melissa Marina Johnston

CEO, Intuitive Intelligence Inc,
Canada

Biography

Melissa Marina Johnston is the destiny & success mentor to the world's top leaders, keynote speaker & Subconscious healer, recently featured expert in Women's Insider and CEO Times. Melissa helps Awakened High Achievers release deep subconscious fears & dissolve the blocks to their dream life, so they can step into their true calling and get paid to do what they love most. With over a decade as a marketing experience, Melissa bridges soul-aligned strategy & channeled guidance with razor sharp intuitive guidance to pursue your destiny or calling. With award winning subconscious healing, Melissa helps visionary leaders meant for more let go of their fears, resistance and repeating blocks to add an extra '0' to their income & break through to their next level of success, FAST.

Break the Ceiling from the Inside Out — the Subconscious Edge Every Entrepreneur Needs

Abstract:

The most successful entrepreneurs in the world share one thing that business school never teaches: they have learned to master their inner world before their outer results can fully expand. In this transformational keynote, Melissa Marina Johnston, Ottawa's Best Business Coach 2025 and the CEO Whisperer, reveals the invisible subconscious patterns that quietly cap entrepreneurial performance, no matter how strong the strategy or how hard the hustle. Using EFT tapping, belief re-patterning, and neuroscience-backed somatic tools, attendees will experience a live five-minute reset that clears fear, self-doubt, and limiting beliefs in real time, and walk away with a practical inner toolkit they can use before every pitch, every high-stakes decision, and every breakthrough moment. This is the session that changes not just what entrepreneur's do, but who they become.

Rizwana Naz Asif

Ulster University London,
UK

Biography

Dr. RizwanaNaz Asif is an outstanding educator and researcher who has a Ph.D. in Computer Science, focusing on utilizing AI in healthcare applications. Having completed 2 MSc degrees in Robotics at Middlesex University and Management at BPP University she is a technically innovative leader. She has an MSCS Bioinformatics degree and an MCS in Hajvery University, with a sound base in life sciences. She has written extensively in leading journals and has more than 20 years of teaching experience in Pakistan and the UK and is a devoted advocate of education, health, and AI in the future, through the use of technology.

Autism-Cantered Multimodal AI for Early Seizure Prediction in Children

Abstract:

Seizures are a major health concern among many children with autism spectrum disorder, requiring timely detection and early warning to reduce risks and support caregivers. This project presents an autism-cantered, AI-based seizure prediction system that uses multimodal physiological and movement signals, including EEG, heart rate variability, motion activity, posture changes, and skin temperature. The system analyses real-time bio signal patterns through lightweight on-device intelligence to identify early seizure-related changes before a critical event occurs. By combining multiple sensor inputs, the proposed approach improves prediction reliability, reduces false alerts, and supports continuous health monitoring without depending entirely on internet connectivity. When high-risk patterns are detected, instant alerts can be sent to caregivers or healthcare support systems for early intervention. This solution aims to improve safety, enhance quality of life, and provide continuous care support for autistic children who are vulnerable to seizure-related emergencies.

Dr Siegfried Isele

Helvetic Minds LLC,
USA

Biography

Dr. Siegfried Isele has led complex software, AI, cybersecurity, and enterprise transformation initiatives across Europe, the United States, the Middle East, and Asia for more than 25 years. As a consultant, entrepreneur, author, international keynote speaker, and ISO/IEC 27001 Senior Auditor, he helps executives build trusted AI through governance, accountability, measurable control, and Swiss reliability. He serves as President of Helvetic Minds LLC (USA) and Chairman of SwissShore AG (Switzerland). His internationally recognized leadership principle is: Control First. Then Autonomy.

Control First. Then Autonomy – Why Most AI Initiatives Fail Before They Scale

Abstract:

Artificial Intelligence is no longer an innovation project—it is becoming core business infrastructure. Yet most AI initiatives fail before they deliver measurable value because organizations scale technology before establishing governance. This keynote demonstrates why accountability, executive ownership, transparency, and measurable controls must precede autonomy. Using practical international case studies, attendees learn a pragmatic framework for reducing risk while accelerating AI adoption. Rather than slowing innovation, governance becomes the accelerator that enables organizations to scale AI with confidence, trust, and sustainable business value. Executives leave with actionable principles that can immediately be applied to enterprise AI programs.

Sheila Simon

San Jacinto College,
USA

Biography

Sheila R. Simon began her career in higher education in 2006 as a business and entrepreneurship faculty and Advisor for the Small Business Development Center. Currently, she is Director –Business Operations and Entrepreneurship, a Certified Practitioner of the Entrepreneurial Mindset Profile (EMP) and holds an industry certification in Entrepreneurship and Small Business (ESB).

Sheila completed both her MA in Organizational Management and BBS at Dallas Baptist University. Her article, “Raising the Bar on Entrepreneurial Learning”, was published in the Winter/Spring 2026 edition of the Community College Entrepreneurship Magazine, receiving an honorarium from San Jacinto College for this accomplishment.

Have Your CAKE and Eat it Too! An Entrepreneurial Leadership Competency Model

Abstract:

Have Your CAKE and Eat It Too! was developed around a learning framework designed to drive advancement of essential leadership and management competencies needed to transform entrepreneurial ideas into scalable results. Anchored in the CAKE framework—Communication, Adaptability, Kaizen Approach, and Entrepreneurial Mindset—this leadership competency model empowers entrepreneurs to turn their vision into coordinated action by aligning people, resources, and priorities for improved decision making that creates real value. The CAKE Framework builds on existing skills for those who want to strengthen their ability to engage in tactful, assertive communication; adapt effectively within volatile, uncertain, complex, and ambiguous (VUCA) environments; create continuous, incremental improvement; and apply an entrepreneurial mindset to manage themselves, relate effectively to others, and solve real-world problems. In economics, most assets depreciate. Skills are one of the few assets you can repeatedly use to create opportunity—and they never get used up. Unlike money, time, or physical resources, skills grow stronger the more you apply them, allowing you to expand your capacity. The CAKE entrepreneurial leadership competency model is especially powerful when applied consistently because it strengthens relationships, improves decision-making, increases entrepreneurial potential and supports success in any industry or organization. Entrepreneurial leadership and management require a combination of vision, influence, and operational discipline to enable ventures to grow and stay resilient in fast moving, uncertain markets.

Jessica Flynn

The YOU Power Project,
Canada

Biography

Jessica Flynn is the Founder & CEO of The YOU Power Project™, a Canadian social enterprise focused on youth empowerment through entrepreneurship and experiential learning. An award-winning educator, consultant, speaker, and systems strategist, her work focuses on developing scalable approaches to future-ready learning, social innovation, and entrepreneurial ecosystem development. Jessica collaborates with municipalities, educational institutions, nonprofit organizations, and international partners to support youth entrepreneurship, competency development, and systems transformation initiatives across local and global contexts.

Social Entrepreneurship as a Scalable Framework for Future-Ready Education and Economic Resilience

Abstract:

As education systems globally confront rapid technological disruption, evolving labour markets, and increasing societal complexity, there is a growing urgency to equip young people with the competencies required to navigate and shape uncertain futures. At the same time, governments, industries, and global institutions are seeking new approaches to strengthen innovation capacity, entrepreneurial thinking, and long-term economic resilience. This practitioner presentation introduces The YOU Power Project™. This Canadian social enterprise uses social entrepreneurship as a vehicle for developing future-ready competencies, including creativity, communication, adaptability, digital literacy, global citizenship, and critical thinking and problem-solving through applied experiential learning. Originally developed as an enrichment-based entrepreneurship program, the model is now evolving into a scalable system activation approach capable of operating within existing educational structures. The framework integrates educator capacity-building, experiential entrepreneurship education, competency-based learning, and technology and AI-enabled personalization to support learners in identifying real-world challenges, designing solutions, and creating community impact through entrepreneurial action. The approach has been piloted through after-school and summer entrepreneurship programs involving youth ages 10–18 across 12 municipalities in Canada. Across multiple cohorts, an average of 89% of participating learners progressed to launching operational ventures, social initiatives, or community-based projects, demonstrating measurable growth in agency, confidence, resilience, and applied entrepreneurial capability. This presentation explores how entrepreneurship education can function not only as a pathway to venture creation, but as a foundational strategy for developing adaptive learners, strengthening local innovation ecosystems, and cultivating the next generation of social entrepreneurs and change makers.

Dash Consigliere

Leviathan Legacy Solutions,
LLC, USA

Biography

D.A.S.H. Consigliere™ is a precision strategist and transformational speaker who helps undervalued high achievers move from stuck with no strategy of their own, to standing on a clear, actionable path to the business and life they were designed for. With 20+ years across corporate, entrepreneurial, and non-profit environments – climbing ladders, building businesses twice, and competing on professional speaking stages – D.A.S.H. brings a firsthand map of every stage of the transition your audience is navigating. The result isn't motivation. It's transformation. Every audience leaves with clarity on their blind spots, a direction that's theirs, and the one move that changes everything

“No Strategy, No Success”

Abstract:

Strategy isn't a luxury – it's the difference between working hard and building something that lasts. This talk is grounded in a real story: how the absence of strategy nearly derailed a career, and how implementing one produced an award, a promotion, and a training framework still in use today. “No Strategy, No Success” draws a sharp, undeniable line between effort and outcome – and makes the cost of operating without a precision strategy impossible to ignore. Audiences leave with a clear framework for building strategy into how they move, decide, and lead – not as an afterthought, but as the foundation everything else is built on.

Sheryl Plouffe

ICONMAKER,
USA

Biography

Helping entrepreneurs, coaches, and consultants scale to Seven Figures with AI-powered systems and high-ticket growth frameworks—without sacrificing integrity. Scaling doesn't have to mean selling out. At ICONMAKER®, we're bringing integrity back to coaching—helping leaders grow with predictable, profitable systems.

Business Growth Strategy: Scaling Smart with Digital Systems

Abstract:

In an increasingly digital-first world, businesses must navigate shifting market conditions, emerging technologies, and heightened competition. For entrepreneurs, consultants, and service-based professionals, the ability to scale smartly is the key to sustainable growth. This paper presents a framework for business growth that leverages digital systems, AI productivity tools, and high-ticket offer models to create a scalable and resilient business strategy. Scaling Smart with Digital Systems Scaling smart does not simply mean doing more—it means building systems that enable efficiency, sustainability, and growth. Digital platforms such as CRM tools, marketing automation, and AI agents are essential for streamlining operations. By implementing these systems, businesses can free up time, reduce overhead, and focus on delivering high-value services. High-Ticket Offer Models A core strategy for sustainable growth is building high-ticket offer systems. By designing premium services aligned with clients' most pressing needs, businesses can generate significant revenue with fewer transactions. When combined with digital automation and visibility strategies, high-ticket offers provide a scalable model that empowers entrepreneurs to grow strategically. The Role of AI and Automation Artificial Intelligence is revolutionizing the way businesses scale. AI-powered productivity tools and agents allow for automation of repetitive tasks, predictive analytics, and enhanced customer engagement. By integrating AI into core business systems, leaders can optimize decision-making and stay competitive in dynamic markets.

Dr Indu mathi

Texila American University,
Guyana

Biography

Dr. Indumathi is the Professor and Head of the Department of Pathology and Assistant Dean of Faculty Affairs at Texila American University College of Medicine. With over a decade of experience in medical education, academic leadership, research, and diagnostic pathology, she has played a key role in developing and strengthening integrated pathology programs and USMLE-based medical curricula across teaching institutions and universities.

A dedicated educator and researcher, Dr. Indu has contributed extensively to medical science through publications in National & International Indexed journals and presentations at international conferences. She served as Secretary and Chairperson of Scientific Sessions at the 6th International Conference on Artificial Intelligence in Healthcare at Texila American University, reflecting her interest in advancing innovation in healthcare education and practice. Her other areas of expertise include Digital Pathology, Diagnostic Pathology- Histopathology, Cytopathology, Hematology, Flow Cytometry, IHC, and clinical practice as a Diabetologist.

Role of Artificial Intelligence and Machine Learning Approaches in Histopathology for Lesion Detection and Cancer Staging

Abstract:

The histopathology is to be the essential basis for cancer diagnosis, classification, and staging. In conventional histopathology, pathologists visually review stained tissue biopsy samples via microscopes. This process is time-consuming. By changing to digital pathology, high-resolution whole slide images are generated by scanning glass slides. Artificial intelligence (AI) models have incredible speed and accuracy in analyzing microscopic structures. Pathologists apply AI and machine learning (ML) tools to assess challenging tissue images so as to improve diagnostic efficiency and accuracy, cut down turnover time, and assist with an early detection and treatment regimen. Micro-metastasis detection is the power of computer vision techniques to locate migrating cancer cells which are difficult for the human eye to see.

Keywords: Artificial Intelligence; Machine Learning; Digital Pathology; Histopathology; Deep Learning; Cancer Staging; Precision.

Nikki Cruise

Joy Inspired LLC,
USA

Biography

Nikki Cruise is an inspiring international speaker, best-selling author, and coach who shares her powerful journey of healing through joy. As a joy coach, she empowers women to embrace their worth beyond circumstances and equips business leaders to lead with abundance and joy every day.

The Joy Factor: Harnessing Faith and Resilience in Entrepreneurial Growth

Abstract:

This abstract explores the intersection of faith, purpose, and resilience in modern entrepreneurship. Drawing from Nikki Cruise's journey as an empowerment coach and founder of Joy Inspired LLC, it highlights how joy can be transformed into a measurable asset for leadership clarity, innovation, and sustainable business growth. Through the Joy Factor model, entrepreneurs learn to embrace emotional intelligence, spiritual grounding, and mindset transformation to overcome burnout and align profit with purpose. The findings emphasize that joy is not an emotional luxury—it is a strategic advantage that empowers leaders to navigate uncertainty, build resilient teams, and drive holistic success. This work contributes to a growing body of research that integrates personal growth, faith-based leadership, and entrepreneurial strategy in shaping the future of purposeful business leadership. Keywords: burnout recovery; emotional intelligence; faith-based leadership; mindset transformation; women empowerment.

Christine Hiebel

Grant Success System,
USA

Biography

Christine Hiebel is the founder of the Grant Success System, an accomplished electrical engineer, and a grant funding strategist who helps entrepreneurs, businesses, and organizations secure non-dilutive funding to fuel innovation and sustainable growth. Drawing on a successful career in engineering and strategic funding, she combines analytical problem-solving with practical business insight to help clients become grant-ready and build competitive funding strategies. Christine is a sought-after speaker and educator who is passionate about empowering innovators to leverage grant funding as a catalyst for entrepreneurship, economic development, and long-term impact.

Grant Funding Without Giving Up Equity: The Competitive Advantage for Innovative Entrepreneurs

Abstract:

Access to capital remains one of the greatest challenges facing entrepreneurs and innovation driven businesses. While many founders focus on investors and debt financing, grant funding represents a powerful source of non-dilutive capital that enables businesses to innovate, grow, and retain ownership. Success, however, requires more than finding funding opportunities, it demands a strategic understanding of the funding ecosystem and the organizational readiness to compete effectively. This presentation explores how entrepreneurs can leverage grant funding and other non-dilutive financing strategies to accelerate innovation, strengthen resilience, and gain a competitive advantage in today's rapidly evolving marketplace. Drawing on practical insights from the Grant Success System, participants will discover what makes an organization fundable, why promising ventures are often overlooked, and how to position their innovations to attract investment from public and private funding sources. Attendees will learn how strategic grant readiness, compelling impact narratives, and collaborative partnerships can transform innovative ideas into scalable ventures that generate measurable economic and social value. The session will provide a practical framework for identifying the right funding opportunities, aligning business objectives with funding priorities, and building a long-term strategy that supports sustainable growth without sacrificing equity. By demonstrating how grant funding can fuel entrepreneurship, innovation, and competitiveness, this presentation challenges traditional assumptions about business financing and equips entrepreneurs with actionable strategies to secure capital while maintaining ownership, expanding capacity, and creating lasting impact.

**Meladul Haq
Ahmadzai**

Common Note,
Canada

Biography

MeladulHaqAhmadzai is the founder of Common Note, a start-up that helps individuals organize tasks and boost productivity. He is from Afghanistan and holds a Master's degree from the University of Manchester (UK).

The Mindset Required to Achieve What Matters

Abstract:

In this session, we explore why giving up is a common human response, often triggered by stress, slow progress, or comparison to others. More than 70% of people experience these moments, yet they do not define our potential. By strengthening mindset, tracking goals, and managing time, discouragement loses its influence. A brief personal academic case study will illustrate this process. Audience and participants will walk away with practical tools for goal setting, motivation, time management, and personal achievement.
