# ABOUT EXHIBITOR

## CHAMPIONS

We, **Champions-Implants GmbH**, are a German medical technology company based in Flonheim, specializing in the development, production, and distribution of dental implant systems. Since our foundation, we have pursued a clear goal: to make modern implantology more efficient, accessible, and cost-effective. We place strong emphasis on practical, real-world solutions that integrate seamlessly into the daily workflow of dental professionals—while also delivering clear benefits for patients.

Our mission is to develop high-quality implant systems that are easy to use while meeting the highest clinical standards. We aim to reduce treatment complexity, time, and costs without compromising on quality or safety. Our vision is to help democratize implantology—making long-lasting tooth replacement accessible to more people, regardless of economic limitations. Innovation, efficiency, and user-friendliness are the core values that guide our work every day. Our product portfolio includes minimally invasive implant systems, solutions for immediate implantation, and well-designed prosthetic components. We are particularly known for our two-piece implant system Champions (R)Evolution, as well as for our one-piece implant solutions and the MIMI® method (Minimal Invasive Method of Implantation), which enables gentle and time-efficient procedures. In addition, we offer training programs and comprehensive services to support dental professionals in their daily practice.

Among our key milestones is the successful international establishment of our implant systems across numerous markets, as well as the continuous expansion and refinement of our portfolio. Through hands-on training concepts and scientifically grounded approaches, we have secured a strong position in the field of implantology. Close collaboration with practitioners is essential to us, as it allows us to continuously improve both our services and our product range.

While many systems are becoming increasingly complex and costly, we consciously focus on a lean and efficient workflow. Our solutions are designed to simplify treatment processes while delivering reliable clinical outcomes—this is what we understand as modern implantolog
